Section C: True or False (10 Marks)

1. A computer can help us draw pictures. **True**
2. A computer works without electricity. **False**
3. The mouse is used to type letters. **False**
4. Shutting down a computer means turning it off safely. **True**
5. A computer cannot play music. **False**

Section D: Match the Following (10 Marks)

1. Monitor → b) Shows pictures
2. Keyboard → a) Used to type
3. Mouse → d) Clicks to select
4. CPU → c) Stores information

5. Shut Down → e) Turns off computer

Section E: Short Answer Questions (20 Marks)

1. **What is a computer? Give one example of what it can do.**

A computer is a smart machine that can perform various tasks by following instructions. For example, it can be used to play games.

2. **Name two roles of a computer in our daily life.**

A computer can be used for studying, such as accessing educational websites, and for communication, like sending emails or video chatting.

3. **Explain how you start a computer.**

To start a computer, press the power button on the CPU or monitor, then wait for the operating system to load on the screen.

4. **Why should we shut down a computer properly?**

Shutting down a computer properly prevents data loss and ensures that all programs are closed safely, protecting the computer's hardware and software.

Section F: Draw and Label (10 Marks)

- **Description:** The drawing should include a monitor, keyboard, mouse, and CPU, each clearly depicted and labeled.

- **Marking Scheme:**

- 5 marks for accurately drawing the monitor, keyboard, mouse, and CPU.
- 5 marks for correctly labeling each part (Monitor, Keyboard, Mouse, CPU).
- Additional consideration for use of colors and neatness.

Section G: Long Answer Question (10 Marks)

1. **Describe how a computer works and name its main parts.**

A computer works by taking input from devices like the keyboard and mouse, processing it through the CPU, and displaying the output on the monitor. The CPU, known as the brain of the computer, handles all the processing tasks. The keyboard is used to type and input data, while the mouse helps select and navigate on the screen. The monitor shows the results, such as pictures or text. The main parts of a computer are the monitor, keyboard, mouse, and CPU.
